

Quantum™ ePrescribing

Safe and effortless
prescription management.

Electronic Prescribing of Controlled Substances (EPCS) in Pennsylvania

Effective **October 24, 2019**, Pennsylvania House Bill 353 will require that all controlled substances be electronically prescribed and electronically received by the filling pharmacy. This includes all schedule II through V drugs. Quantum ePrescribing offers this service to providers for a low monthly fee with optional Electronic Prior Authorization service.

ePrescribing with EPCS is only \$29 per month per provider

(security token required for an additional annual fee)

ePrescribing with EPCS and Electronic Prior Authorization service is \$39 per month per provider

(security token required for an additional annual fee)

Clinicians with an EHR that does not support EPCS or those without an ePrescribing service should consider Quantum ePrescribing.

To add ePrescribing to your existing account or to learn more, call **1.888.835.3409**, or email **SalesSupport@Quantum.com**.

Quantum ePrescribing • How it works

1. The provider enters the medication order to the patient's pharmacy of choice.
2. The real-time prescription benefit shows the patient's out-of-pocket cost at 3 pharmacy options, as well as a less expensive, equally viable therapeutic alternative.
3. Electronic prior authorization (EPA) finds the correct PA form and automatically populates the patient's information and displays required questions.
4. The request is submitted to the payer.
5. Prior authorization is approved.
6. If the prescriber needs to start the patient on a specialty medication, specialty patient enrollment pulls the form into the prescriber's workflow and connects to the specialty hub.
7. The patient arrives at the pharmacy and the medication is ready for pickup and the patient knows in advance how much it will cost.

Gain efficiencies by ordering and renewing prescriptions electronically.

Help enhance patient safety by reducing prescription abandonment, and reduce the risks of adverse events with instant access to contraindications, interactions, and patient medication history.

Build patient loyalty by helping to save your patients money. ePrescribing offers manufacturer coupons and incentives that can be sent electronically directly to their pharmacy or printed.

Manage health plan complexities with easily identified, tiered formulary alternatives, patient eligibility, coverage, and co-pay information.

Access prescription history with a click of a button—whether it's a new patient, or if verifying an existing patient's medication. Enjoy around-the-clock access from your PC, iPad®, and most smartphones.

ePrescribe most* medications anytime, anywhere with your iPad, iPhone®, or Internet-enabled PC.

Complementary features:

Electronically prescribe controlled substances (EPCS). EPCS is a DEA-certified solution that also helps reduce medication errors, prescription theft, and forgery. As efforts to stem the opioid epidemic grow, the number of states mandating EPCS is increasing. Seamlessly send EPCS to retail or mail-order pharmacies.

Pharmacy Benefit Manager (PBM). Save time and money by electronically submitting prior authorization requests for medications that require prior approval by a patient's PBM.

Real-time prescription benefit. Helps doctors choose the best medications for patients, the first time.

*Schedule II-IV drugs can be ordered via iPad and iPhone, however they must be transmitted via an Internet-enabled PC.
